

Help Prevent Healthcare Associated Infections (HAI)

Learn How To Demonstrate and Audit PPE Practices

We are proud to introduce our new education program for Infection Prevention Skills Demonstrating and Auditing. Our Infection Preventionists will come to your facility and educate staff on proper Personal Protective Equipment protocols and procedures. Invite your clinical staff, environmental services, and even your administrators!

After attending this training, you will be able to;

- Describe what proper PPE donning and doffing is and its importance in a healthcare setting.
- Identify when and how to use the correct PPE in specific scenarios.
- Audit don and doff practices in your facility and encourage feedback/coaching.
