

Provider Card - Hepatitis C Confirmatory Test

- Give this card to your healthcare provider.
- Talk to your doctor about getting tested for hepatitis C and vaccinated against hepatitis A & B.

Hepatitis C is a serious but curable disease that can lead to liver damage, cancer, and even death. Safe and effective treatment is available. The first step to health is knowing your hepatitis C status.

DOH 150-262 CS June 2024 To request this document in another format, call 1-800-525-0127. Deaf or hard of hearing customers, please call 711 (Washington Relay) or email doh.information@doh.wa.gov.

Dear healthcare provider,

I was screened for and tested reactive for hepatitis C antibodies on _____ (*write in test date*).

I would like to complete hepatitis C confirmatory testing.

If I have a hepatitis C infection, I would like to begin hepatitis C treatment as soon as possible. Hepatitis C treatment can be provided by clinicians with prescribing authority. I would also like to be vaccinated against hepatitis A & B, if my records indicate I am at risk for these infections. Thank you!
