

VACCINE ADVISORY COMMITTEE MEETING
VIRTUAL MEETING - ZOOM
July 11th, 2024

Time	Agenda Item	Facilitator
11:00 – 11:15	Welcome, Announcements, Introductions, Land Acknowledgement	Scott Lindquist
11:15 – 11:20	Conflict of Interest Declaration	Meghan Cichy
11:20 – 11:25	Approval of Last Meeting Minutes	Scott Lindquist
11:25 – 11:35	Public Comment	Scott Lindquist Lisa Balleaux
11:35 – 11:45	Office of Immunization Program Director Updates	Jamilia Sherls
11:45 – 11:55	COVID-19 Vaccine Director Updates	Alison Hilkih
11:55 – 12:05	Director Update Discussion	Jamilia Sherls Alison Hilkih
12:05 – 12:15	Equitable Distribution of Vaccines Presentation	Janel Jorgenson
12:15 -12:25	Equitable Distribution of Vaccines Discussion	VAC Members and DOH Staff
12:25 – 12:55	VAC Member Report Out	VAC Members
12:55 – 1:00	Future Agenda Items 2024 VAC Meeting Dates: October 10th Adjourn	Scott Lindquist

Time	Agenda Item	Facilitator
11:15 – 11:20	Conflict of Interest Declaration	Meghan Cichy

Decisions made by committee members should always be based solely on the best interest of the department and the people of Washington State. Decisions should not be influenced by personal financial interest or by other extraneous considerations. Any affiliation with an organization having fundamental goals that conflict with the department and VAC mission should be avoided. Any current, previous (within two years), or future potential conflict of interest should be disclosed at the beginning of each VAC meeting.

A potential conflict of interest exists when a committee member has a relationship or engages in any activity or has any personal financial interest which might impair their independence or judgment or inappropriately influence their decisions or actions concerning VAC matters.

A potential conflict of interest exists and should be disclosed if the committee member:

- Has a relationship with an entity that benefits financially from the sale of vaccines, such as a consultancy, serving on a speaker's bureau, receiving honoraria, research and/or travel support.
- Owns a material financial interest in any business that provides or seeks to provide goods or services to the department.
- Serves as an officer or participates on the board or committees of other related professional societies that receive direct financial benefit from the sale of vaccines.
- Has an affiliation with an organization that has a financial interest in VAC recommendations.
- Has an affiliation with an organization that has a competing activity.

Each committee member has a high duty and obligation to disclose to the entire committee any potential conflict of interest and to abstain from any decision where a significant conflict of interest exists. Ultimately, it is the responsibility of the entire committee to determine what, if any, limitations on activities with regard to the committee member's conflict are required to protect the VAC.

Time	Agenda Item	Facilitator
11:20 – 11:25	Approval of Last Meeting Minutes	Scott Lindquist
11:25 – 11:35	Public Comment	Scott Lindquist Lisa Balleaux

Office of Immunization Update
Jamilia Sherls, Director – Office of Immunization

New Office of Immunization Personnel

Jéaux Rinedahl, PhD, RN, CQS Manager

Started May 1, 2024

Kena Fentress, Engagement and Planning Section Manager

Started June 16, 2024

Response to Recovery

- The COVID-19 Vaccine Program was sunset at the end of June 2024, and many aspects will be transitioned into the Office of Immunization, i.e. Bridge Access Program.
- **New section: Engagement and Planning**
 - Engagement with partners, i.e. LHJs, Tribes, providers, community.
 - Pandemic/VPD response planning and readiness
 - Project Planning
 - Vaccine Equity
- Preparing to make decisions about OI bodies of work that will continue beyond December 31st, 2024, and June 30th, 2025.
 - Considerations: Funding, CDC priorities, Work valued by partners, Agency priorities.

School Immunization Data Dashboard Updates

June 12, 2024: DOH published an updated data dashboard on [school immunization reporting](#).

- Overall, school immunization rates for the 2023-24 school year have remained flat compared to the 2022-23 school year.
 - *There are still significant vaccination gaps in different parts of the state.*
- School-level immunization data is available for download by school building and district.
 - *Following our small-numbers guidance, we suppress school-level vaccination data for school cohorts with 10 or fewer kids when sharing data.*
- It remains important for families to keep their children up to date on vaccines as they prepare for the next school year.

If you have questions about the updated dashboard, please email the data request inbox at WAIISDataRequests@doh.wa.gov.

Routine Childhood Immunization Data Dashboard Updates

- Will replace current dashboard
- Updated methodologies to generate more accurate estimates
 - Documentation included
- What's new?
 - Transfer from Tableau to PowerBI platform
 - Consistent look with other OI dashboards
 - Inclusion of race/ethnicity data
 - HPV coverage data for 9-10 year olds
- Downloadable data files will be available
- Expected to be published by 7/26/24
- Feedback is welcome and can be sent to WAIISDataRequests@doh.wa.gov

School Exclusion Policy Work

The Office of Immunization is working on a project to assess barriers related to school immunization compliance.

Goals:

To understand the current scope and state of school exclusions for out of compliance (OOC) students.

Anticipated Outcome:

Information gathered through this assessment will help us learn, tailor, and implement future interventions to address barriers to school immunization compliance.

*This effort and our engagement work is still actively in progress.
We look forward to sharing future updates!*

Respiratory Season Planning

RSV, Flu, and COVID-19

Focusing on respiratory vaccines and immunization products, our planning includes thinking through our allocation process and fulfilling orders equitably, IIS needs, comms, health promotion and education materials.

- Reviewing approaches to allocation during times of limited supply.
 - Time periods when new product becomes available and only available to us in small increments at a time.
 - True vaccine supply disruptions.
- Outreach efforts to birthing hospitals to understand their Nirsevimab implementation plans.
 - Currently about half of birthing hospitals are enrolled in the Childhood Vaccine Program.
 - We want to better understand if birthing hospitals:
 - intend to offer Nirsevimab
 - intend to enroll in CVP or not
- How to approach and promote seasonal flu vaccination for agricultural workers.

ACIP Meeting Summary

RSV

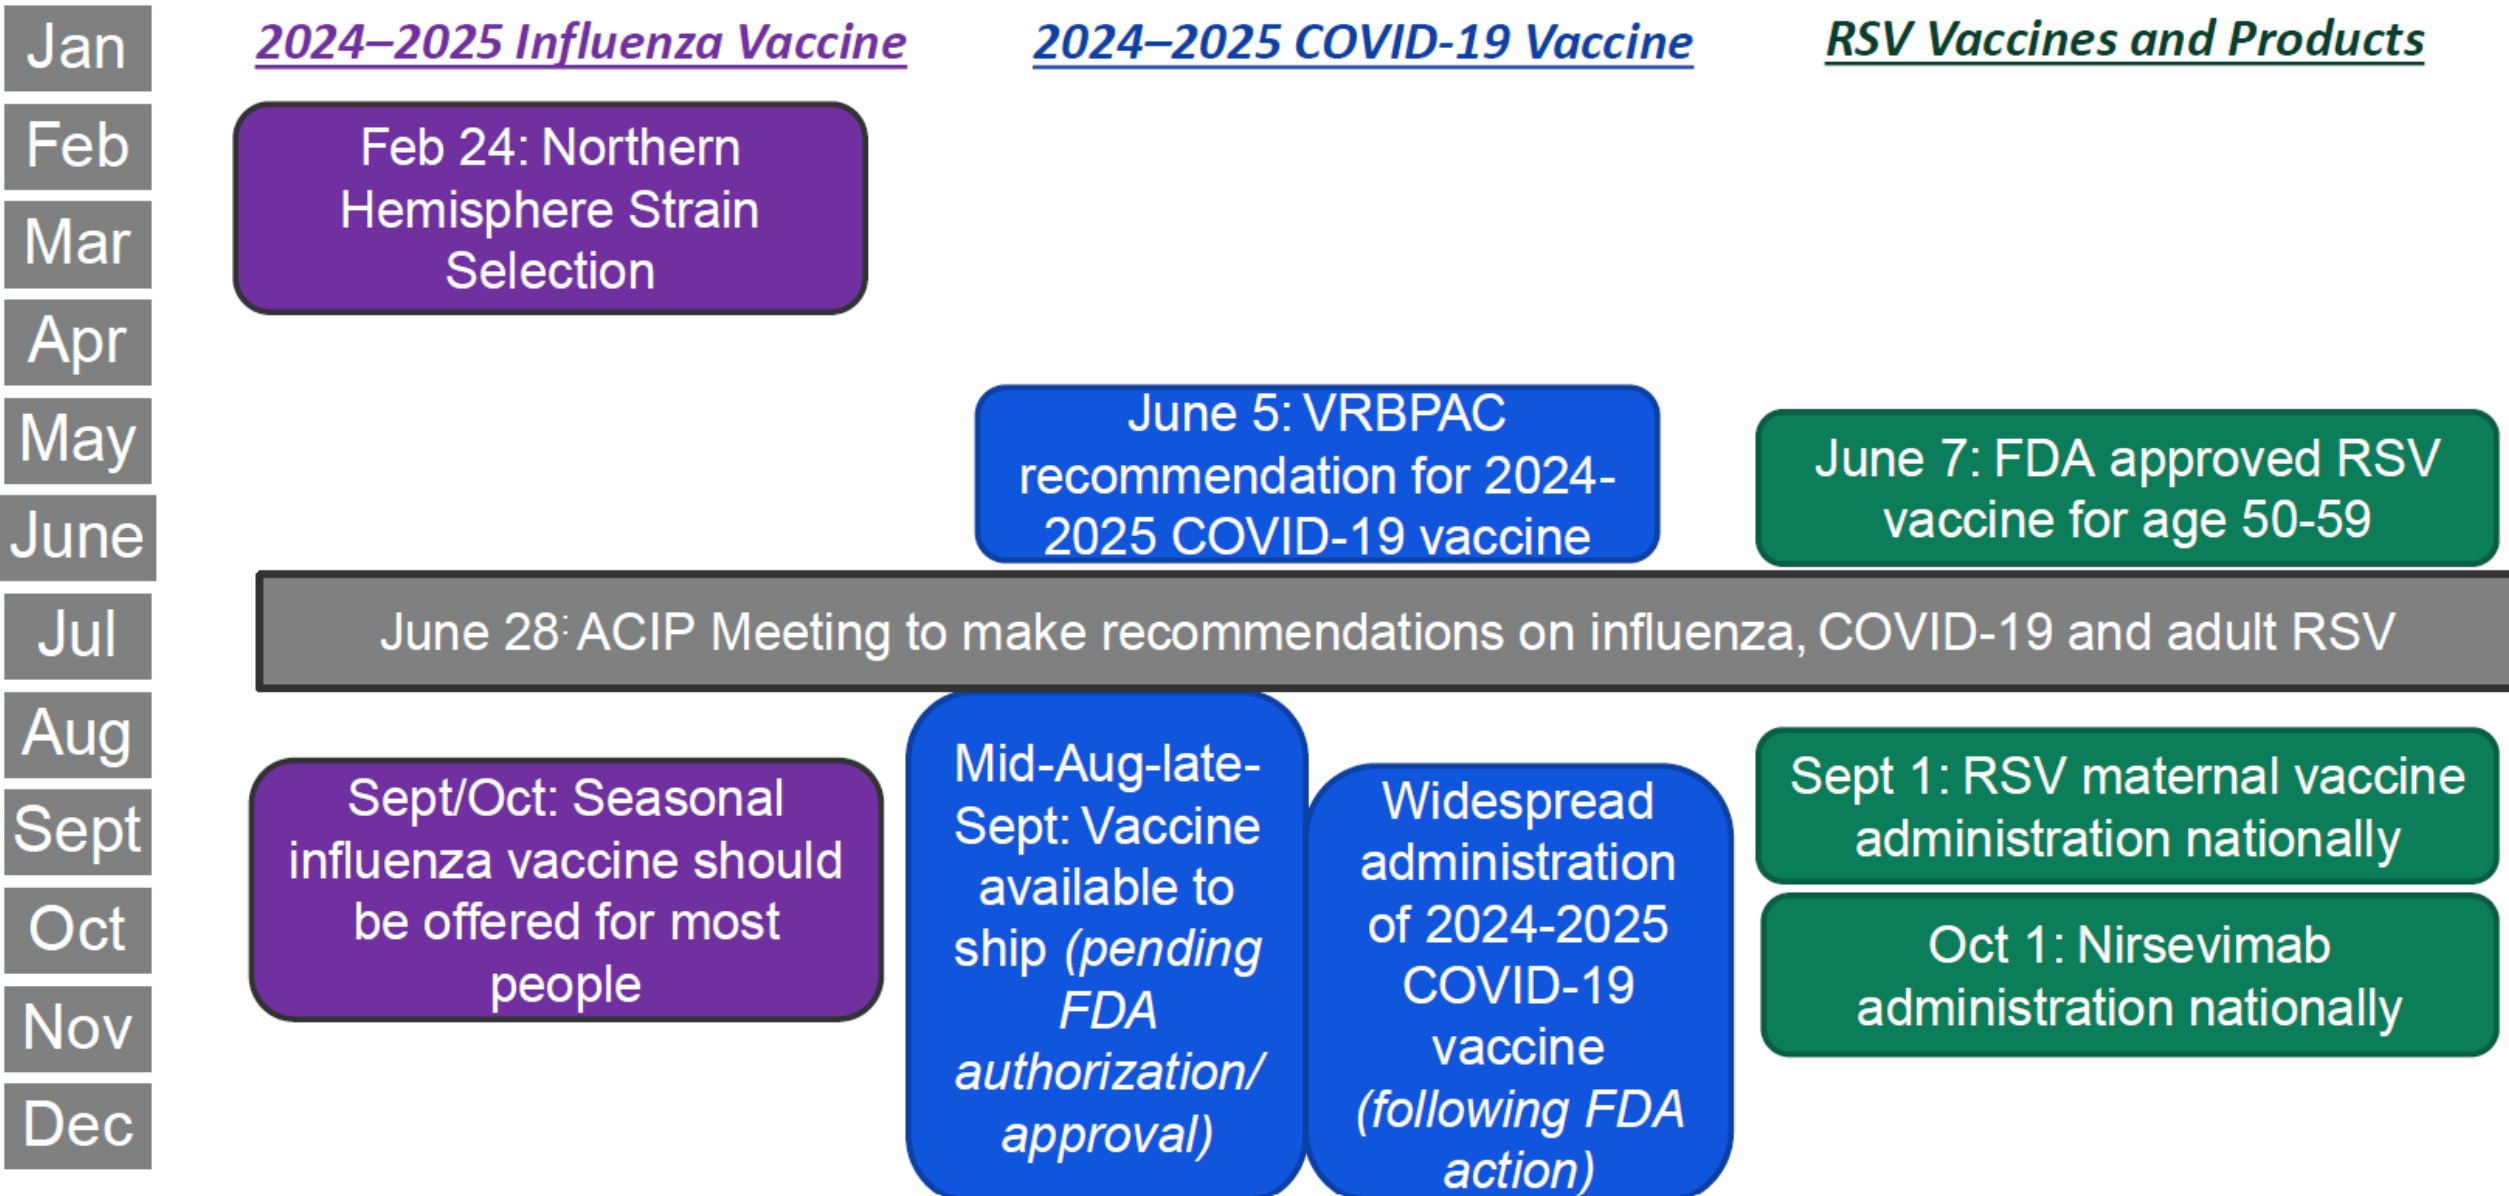

- **ACIP voted unanimously (11-YES – 0-NO) in favor of recommending RSV vaccines for older adults.**
- This includes a transition away from shared clinical decision-making on RSV vaccines for older adults:
 - ACIP recommends adults 75 years and older receive a single dose of RSV vaccine.
 - ACIP recommends adults 60-74 who are at increased risk of severe RSV disease receive a single dose of RSV vaccine.
- Adults who have already received a dose of RSV vaccine do not need to receive another dose this year.

Influenza (Flu)

- **ACIP reaffirms the recommendation for a routine annual influenza vaccination for persons 6 months and older who do not have contraindications.**
- Flu High Dose Solid Organ Transplant Recipients 19-64: ACIP recommends high dose inactivated, adjuvanted inactivated, and/or recombinant flu vaccines as an acceptable option for influenza vaccination for solid organ transplant recipients ages 19-64 who are on immunosuppressive medication regimens.

Full copy of presented meeting materials: [ACIP June 26-28, 2024 Presentation Slides | Immunization Practices | CDC.](#)

Anticipated Fall Timeline

ACIP HPV Vaccine Workgroup

DOH's Office of Immunization Director, Jamilya Sherls, will be participating in the ACIP HPV Vaccine Workgroup!

- **Work Group start date:** July 1, 2024
- **Work Group Purpose:** The Human Papillomavirus (HPV) Vaccines Work Group reviews and evaluates data on HPV disease, epidemiology, and vaccine and to develop possible modifications to policy for ACIP's consideration.
- **Topics under discussion by the Work Group:**
 - Reducing the number of vaccine doses in the recommended HPV vaccination series
 - Wording of the age for routine vaccination
 - Guidance regarding persons in the “shared clinical decision-making” age range
- **Work Group activities:**
 - Reducing the number of vaccine doses in the recommended HPV vaccination series
 - Wording of the age for routine vaccination

For more information: [Advisory Committee on Immunization Practices \(ACIP\) Work Groups - HPV | CDC](#)

IIS Awards AIRA

American Immunization Registry Association

AIRA Recognized the work of two Prevention and Community Health Division individuals, and one team in the 2024 awards.

- **Consider It Done Award: Cameron Minich**
Goes the extra mile while maintaining an upbeat and positive attitude.
- **Superstar Award: Jeffrey McIntyre & April McClellan**
Exceeds expectations in both the excellent quality of their work and their everyday encounters with others.
- **Dream Team Award: WA DOH IIS Team**
The team worthy of this award has modeled unwavering reliability and commitment through their participation across several work groups and projects.

Thank you!

COVID-19 Vaccine Program Update

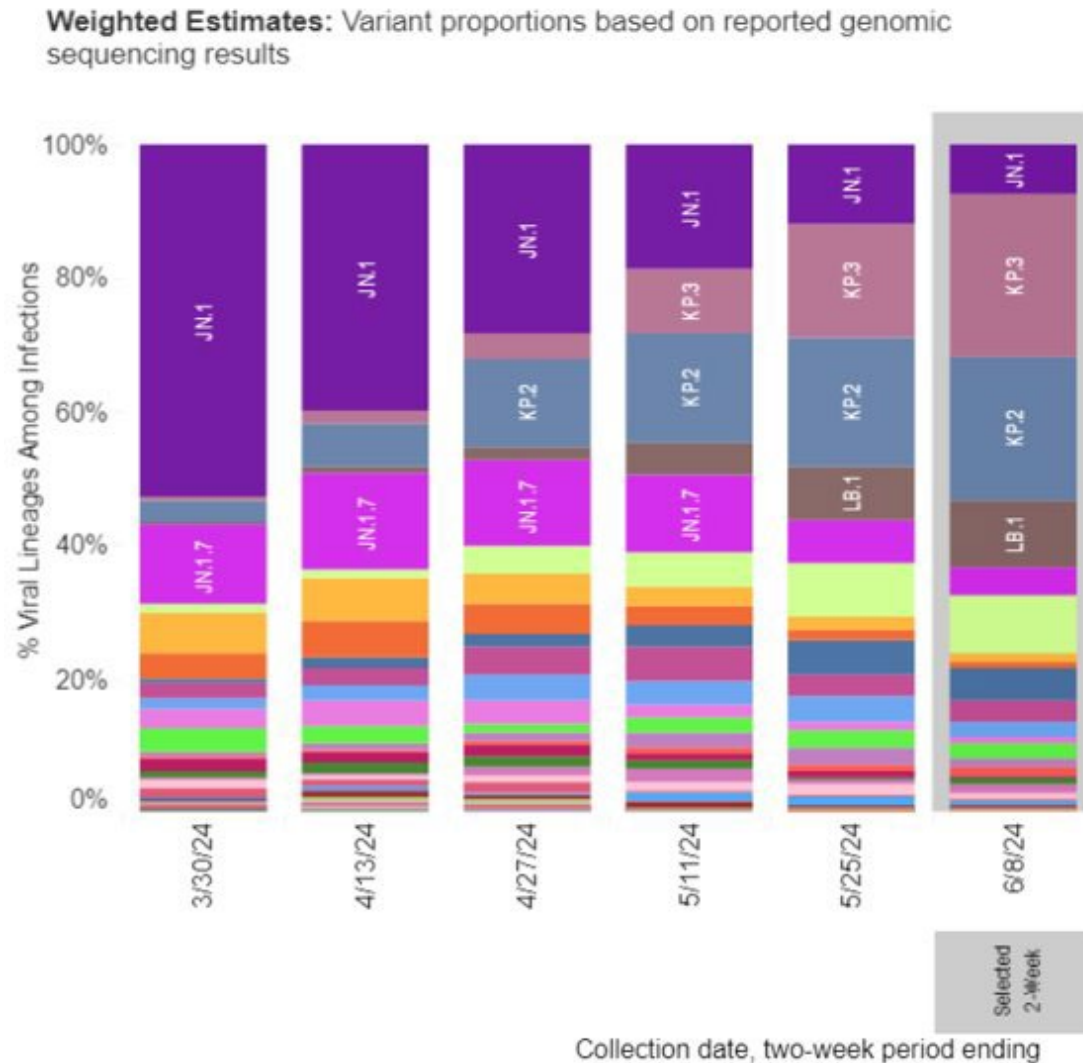

Alison Hilkihah, *Director of Healthcare Engagement and Partnerships (OHIS)*

COVID-19 Variants

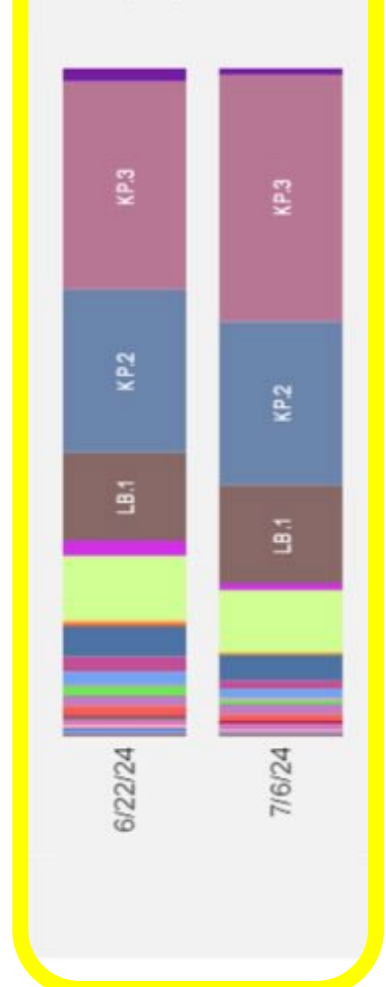

7/6/24 CDC Report:

- Data suggests a JN.1 variant vaccine would protect against JN.1, KP.2, KP.3, and other JN.1 subvariants.
- KP.1.1, KP.2, KP.3, and LB.1 are descendants of JN.1

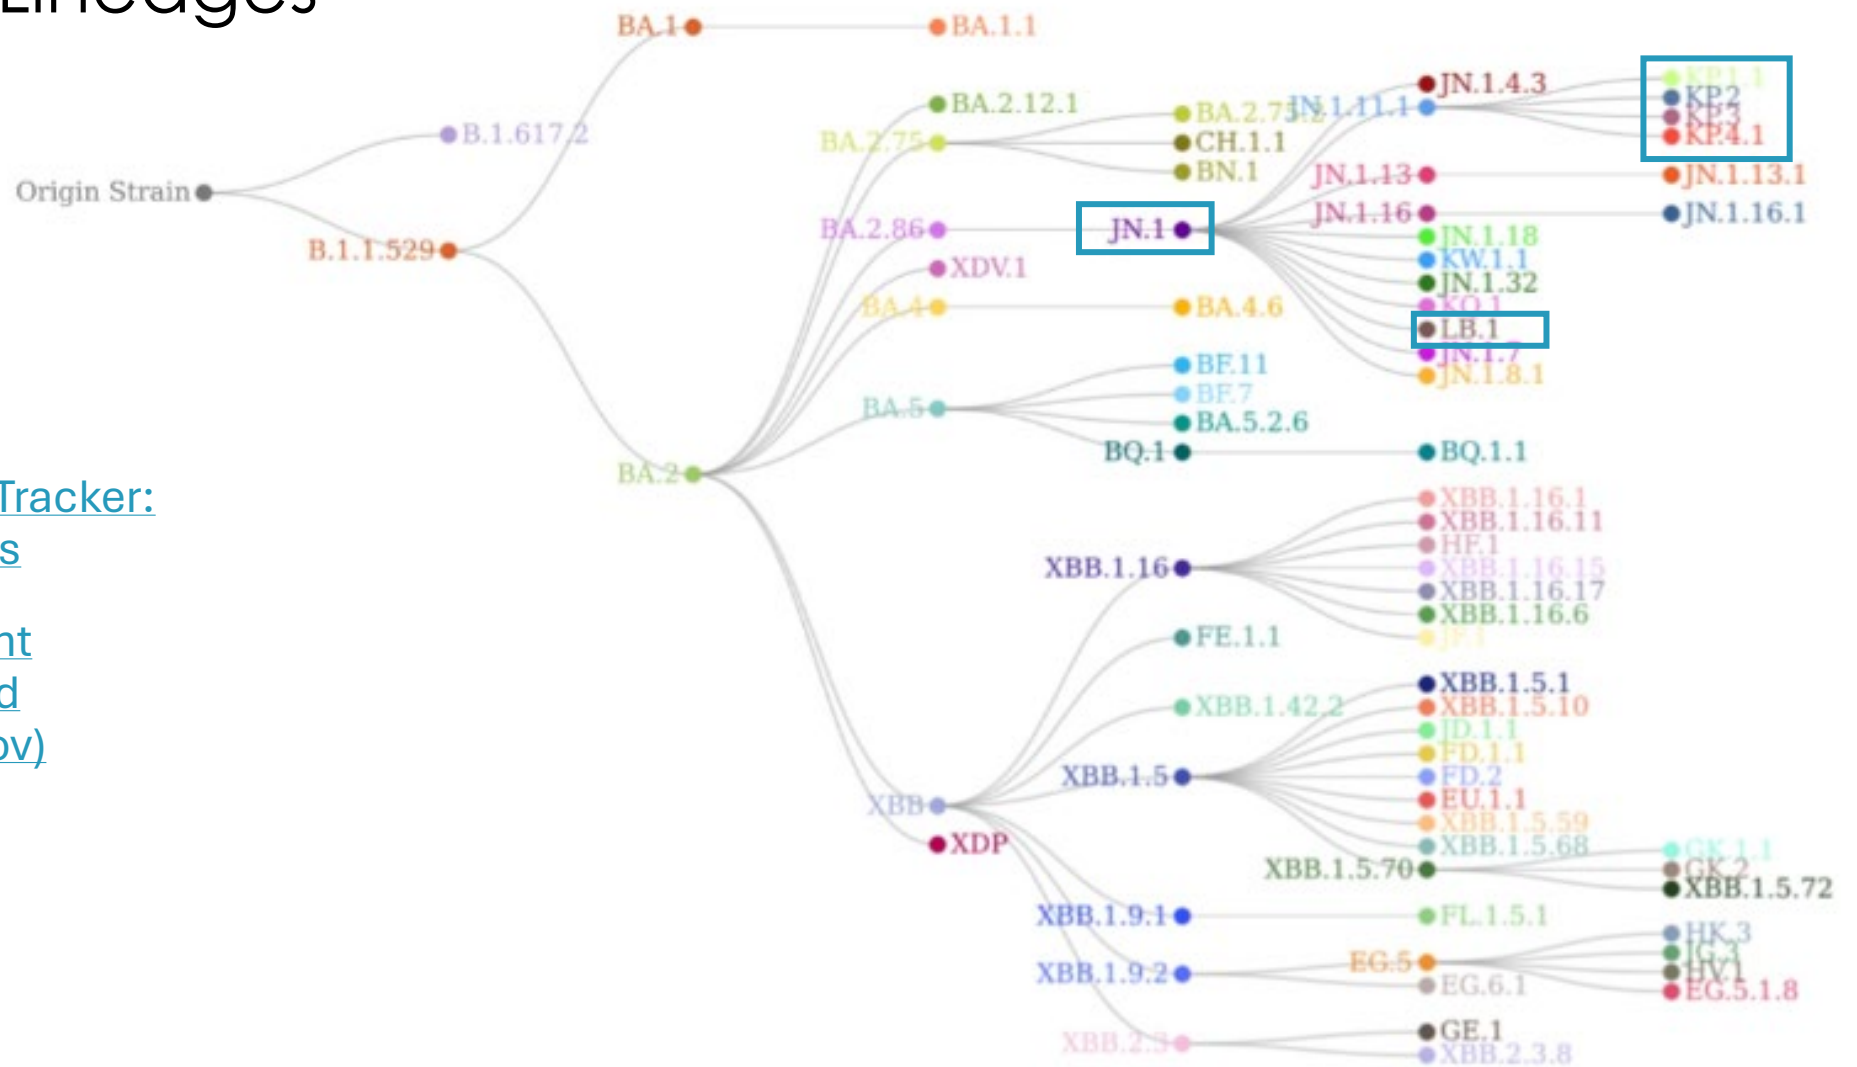

USA			
WHO label	Lineage #	%Total	95%PI
Omicron	KP.3	36.9%	31.2-43.0%
	KP.2	24.4%	20.0-29.3%
	LB.1	14.9%	10.6-20.4%
	KP.1.1	9.2%	6.0-13.6%

NowcastSM: Model-based projected estimates of variant proportions

COVID-19 Lineages

- [CDC COVID Data Tracker: Variant Proportions](#)
- [SARS-CoV-2 Variant Classifications and Definitions \(cdc.gov\)](#)
- [Cov-Lineage List](#)

VRBPAC Recommendation

- On June 5th: Vaccines and Related Biological Products Advisory Committee (VRBPAC) unanimously in favor of selecting a monovalent JN.1-lineage COVID-19 subvariant as the strain for the 2024–2025 COVID-19 vaccine.
- On June 12th: [FDA updated this announcement](#) to note that their preferred JN.1 lineage was the **KP.2** strain, if feasible.
 - *The FDA also noted that they did not anticipate that a change to **KP.2** would delay the availability of the vaccines for the United States.*
- The FDA advised the manufacturers of the licensed and authorized COVID-19 vaccines of these recommendations.
- [ACIP met](#) June 26-28, 2024, to discuss recommendations for COVID-19 vaccines to be available the beginning of this Fall.

2024-2025 COVID-19 Vaccine ACIP Recommendation

“CDC recommends **everyone ages 6 months and older receive an updated 2024-2025 COVID-19 vaccine** to protect against the potentially serious outcomes of COVID-19 this fall and winter whether or not they have ever previously been vaccinated with a COVID-19 vaccine.”

Seasons of Change

COVID-19 work is not done or over, but as of this week...there are no COVID-19 emergencies to report!

Team transitions:

- The COVID-19 Vaccine Program was sunset at the end of June 2024, and many aspects have been transitioned into the Office of Immunization.

We welcome your thought partnership and feedback in defining what ongoing gaps and needs should be prioritized and where we can continue working together.

Navigating Changes and Shifts

Numerous staff from the COVID-19 Vaccine Program have moved into new roles at DOH, and others have moved on to opportunities outside of the agency.

This change will end the bodies of work for some project staff members in the COVID-19 Vaccine Program and the Office of Immunization. These team members dedicated countless hours traveling across the state to:

- Provide equitable vaccine access with Care-a-Van
- Onboard and offboard providers to the COVID-19 Vaccine Program
- Ensure provider access and data quality in the Immunization Information System
- Onboard providers and LHJs to PrepMod for increased access
- Support Power of Providers outreach and engagement with LatinX communities
- Answer thousands of phone calls, support records requests, and much more

What to Expect

New Homes

- Some of the staff and their work has moved to the Office of Immunization.
- Others, specifically the Care-a-Van and Power of Provider Initiatives, are proposed to move to the new Executive Office of Healthcare Innovation and Strategy on July 1.
- Some services may get different names as they settle into their new homes at the agency, while other bodies of work may be supported by different people.

Timelines

- Response timelines and capacity will be adjusted from the unprecedented pandemic response to reflect the new locations within the agency.

Pop-Up Immunization Clinic Guide

DOH's Planning and Response Team created the [Pop-Up Vaccination Clinic Guide](#) that is now available to the public on the [Immunization | Washington State Department of Health](#) DOH webpage, in the *LHJ Resources subsection*.

- **Intended Audience:** LHJs, Community Organizations, and Immunization Providers.
- **Intended Purpose:** A tool to be used as a general guide of common steps an organizer would need to consider and prepare for when planning and setting up a Pop-Up Vaccination/Immunization Clinic in their community.

FALL & WINTER RESPIRATORY SEASON VACCINE ALLOCATION PLANNING

Office of Immunization

Topics Covered

- Terms and definitions to help ground
- Limited supply scenarios for when allocation needed
- Operating Assumptions
- Overview allocation and order fulfillment process
- Proposed Allocation Criteria
 - Childhood Vaccine Program (CVP)
 - COVID-19 & Flu
 - Nirsevimab
 - Adult Vaccine Program (AVP)
 - COVID-19 & Flu
- Discussion Questions

Definitions

Term	What do we mean?
Allocation	<p>Allocation is an ordering control put in place by CDC. Program receives a limited number of doses available to fulfill provider orders. Amounts are refreshed on designated schedule.</p> <p>In turn, the state determines the number of doses to reserve for different groups to equitably distribute available product across the state.</p>
Ordering cycle	<p>The window of time when vaccine orders are placed, reviewed, and approved.</p>

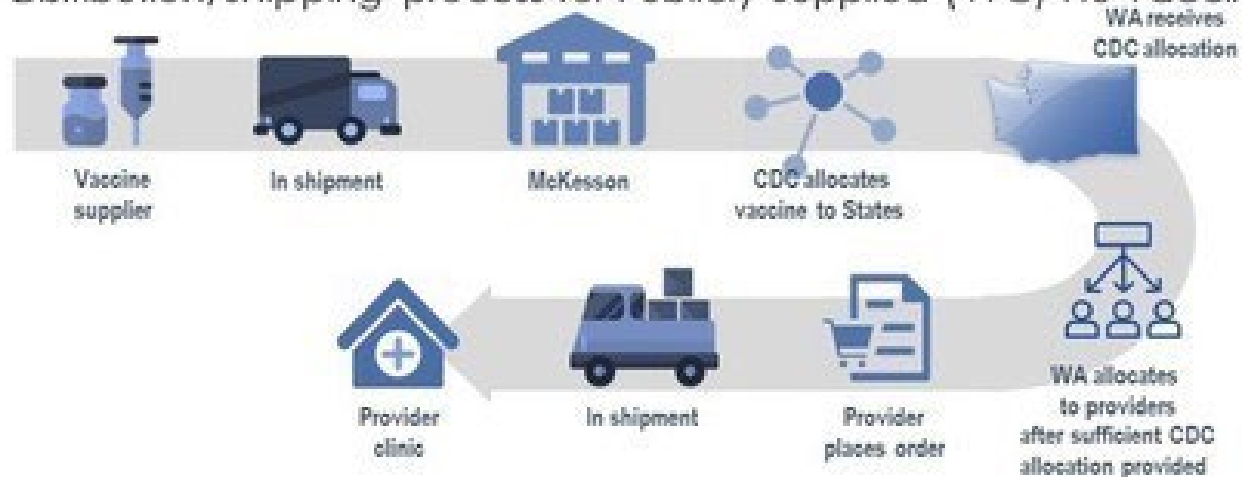

Distribution Overview

When Will Vaccine be Available?

Distribution/Shipping process for Privately Purchased Flu Vaccine

Distribution/Shipping process for Publicly Supplied (VFC) Flu Vaccine

Preparing for Fall & Winter Respiratory Season

- Influenza, COVID-19, and RSV vaccine and immunization products
- Scenarios for vaccine allocation
 - Limited supply at start of season until steady state is reached when supply meets demand (temporal shortage at ramp-up)
 - Limited supply that will not meet demand for the season. Production or supply short falls (longer shortage for the season.)
- For either scenario, we need to develop approaches to allocate product equitably when demand exceeds supply and until supply available can meet all requests.

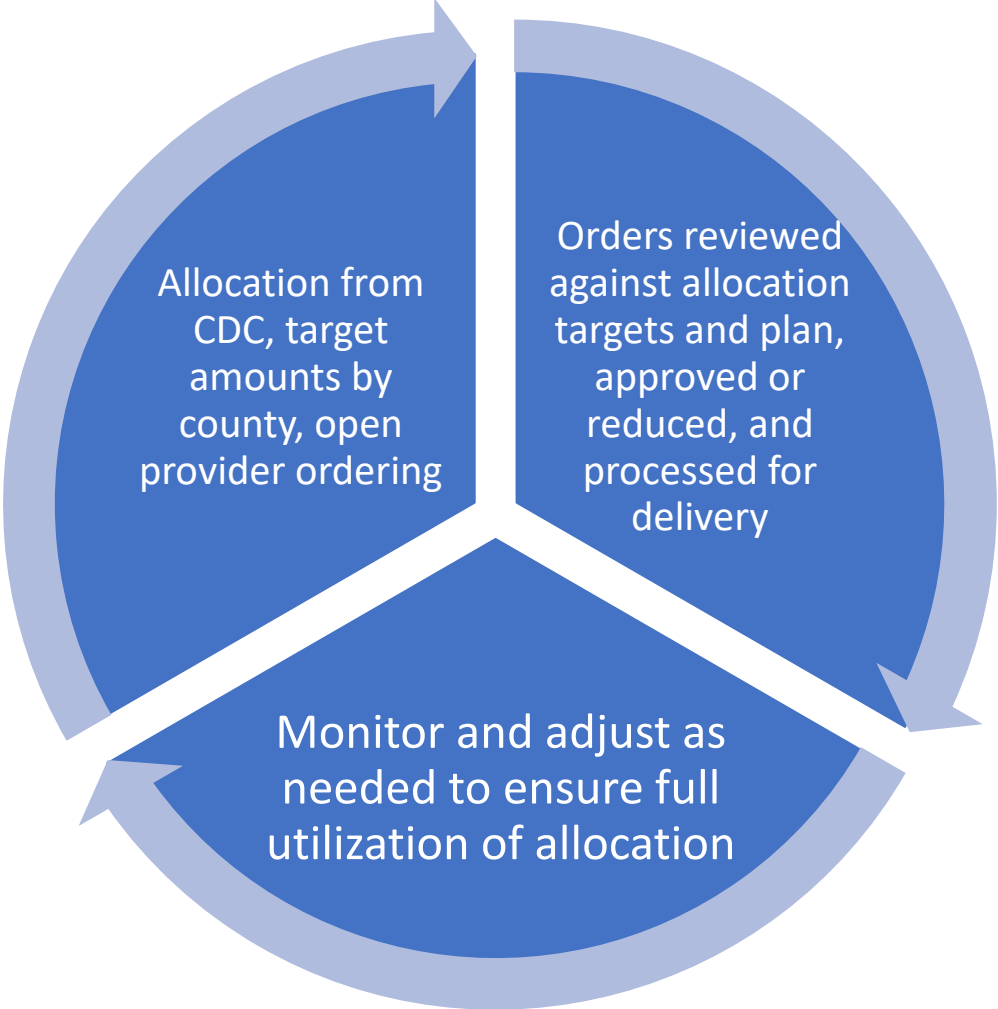

Assumptions

- Limited supply at start of season as allocation from CDC becomes available.
- Receive allocation of flu vaccine from CDC upon receipt from manufacturers until we reach total expected.
- Receive allocation of COVID vaccine from CDC and upon receipt from manufacturers.
 - Weekly through Oct; then bi-weekly
- Receive allocation of nirsevimab every two weeks until we reach steady state. Expect to receive sufficient supply for the season. Limited availability September and broader availability by October 1.

Assumptions (cont.)

- Vaccine orders submitted to DOH will be processed weekly according to the allocation plan.
- High-use of allocation is needed to receive additional allocation (i.e., draw down allocation available from CDC to receive more.)
- Unused allocation week to week will need to be reallocated to support unmet orders.
- End allocation when supply meets demand and return to routine processing of orders.

Allocation & Order Fulfillment Process

- Providers must be compliant with accountability requirements to receive allocation.
- Orders will be prioritized according to pro-rata allocation plan by county and reserved groups
- Goal is to maximize the number of providers receiving some doses. May reduce order quantity for this reason.
- Consideration will be given to practice size, previous ordering history and usage, existing inventory, and any extenuating circumstances.

Childhood COVID-19 & Flu Vaccine

Allocation Criteria Proposed

- Reserve 5% for Tribal Health Clinics
- Reserve 10% for DOH events (i.e., Care-a-Van mobile vx events)
- Reserve 85% for Childhood Vaccine Program (CVP) providers. Develop county-level proportion to apply to available allocation:
 - Population 0-18 years by county
 - Social Vulnerability Index (SVI) score by county
 - Number of providers enrolled in Childhood Vaccine Program by county

Childhood RSV-Nirsevimab

Allocation Criteria Proposed

- Reserve % for Tribal Health Clinics
- Reserve % for Childhood Vaccine Program (CVP) providers. Develop county-level proportion to apply to available allocation:
 - Population eligible for vaccine by county
 - Social Vulnerability Index (SVI) score by county
- Hospitals prioritized for orders first, then all other enrolled providers.

*Week to week adjustments made to factor residents in counties who seek care/births in neighboring counties. Especially for counties with unused allocation.

Nirsevimab and Birthing Hospitals

Enrolled Hospital Name
CENTRAL WA HOSPITAL PHARMACY
OLYMPIC MEMORIAL HOSPITAL PHARMACY
PEACEHEALTH ST JOHN MEDICAL CENTER
SAMARITAN HOSPITAL MOTHER BABY UNIT
WHIDBEY HEALTH MEDICAL CENTER PHARMACY
ST. MICHAEL MEDICAL CENTER - SILVERDALE
PROVIDENCE CENTRALIA HOSPITAL
MASON GENERAL HOSPITAL FAMILY OF CLINICS
NEWPORT COMMUNITY HOSPITAL
MID-VALLEY HOSPITAL
ST JOSEPH MEDICAL CENTER
MARY BRIDGE CHILDRENS HOSPITAL
MULTICARE GOOD SAMARITAN HOSPITAL PHARMACY
MULTICARE TACOMA GENERAL ALLENMORE
OVERLAKE HOSPITAL MEDICAL CENTER
ST FRANCIS HOSPITAL PHARMACY
VALLEY MEDICAL CENTER HOSPITAL
EVERGREEN HOSPITAL MEDICAL CENTER
MULTICARE AUBURN REGIONAL MEDICAL CENTER
ST ANNE HOSPITAL
SWEDISH MEDICAL CENTER - ISSAQUAH
ISLAND MEDICAL CENTER PHARMACY
SKAGIT VALLEY HOSPITAL PHARMACY
SRH CASCADE VALLEY HOSPITAL
WEV PROVIDENCE REGIONAL MEDICAL CENTER E
PROVIDENCE HOLY FAMILY HOSPITAL
WSH SACRED HEART
MULTICARE VALLEY HOSPITAL SPOKANE
MULTICARE DEACONESS HOSPITAL
MULTICARE CAPITAL MEDICAL CENTER HOSPITAL
PROVIDENCE SAINT PETER HOSPITAL
WSM PROVIDENCE SAINT MARY MEDICAL CENTER
PEACEHEALTH ST JOSEPH MEDICAL CTR
SUNNYSIDE COMMUNITY HOSPITAL
YAKIMA VALLEY MEMORIAL HOSPITAL

- ~35 hospitals enrolled in Childhood Vaccine Program
 - Able to order nirsevimab from state

- ~59 birthing hospitals in Washington state

- Outreach plans to birthing hospitals
 - Understand plans for offering nirsevimab
 - Unenrolled hospitals
 - Enrolled hospitals
 - Webinar on CVP and enrollment
 - Communicate updates to all partners as we have information to share
 - Gain lessons to inform allocation planning

Adult COVID-19 & Flu Vaccine

- Limited 317 funding/ budget available for vaccine purchase
 - Approximately \$1.2 million to spend for the entire program annually
 - End of the Bridge Access Program (\$1.4M through June 30)
 - More vaccine products being added to the adult schedule
 - Increased vaccine prices
 - No increase in budget
- Products available for request through AVP
 - Flu Fluarix 8,000 doses pre-booked
 - COVID-19 Moderna/ Novavax TBD doses
 - Currently re-enrolling providers to analyze provider vaccine prioritization rankings of COVID-19 vaccine.
 - Moderna and Novavax will be offered. Pfizer will not be offered due to cost.

Adult COVID-19 & Flu Vaccine

Allocation Criteria Proposed

Reserve 5% for Tribal Health Clinics

Reserve 10% for DOH events (i.e., Care-a-Van mobile vaccine events)

Reserve 85% for other AVP providers who prioritized flu and/or COVID-19 vaccine types

- Develop county-level proportion to apply to available allocation:
 - Vaccination rates 19+
 - Social Vulnerability Index (SVI) score by county
 - Uninsurance rates per county

Adult COVID-19 & Flu Vaccine

Allocation Criteria Proposed (cont.)

Other factors considered:

- Provider vaccine prioritization rankings
- Number of uninsured patients served at facility (self-reported)
- Amount ordered last season vs. amount administered/ wasted

Discussion Questions

- What questions do you have?
- What feedback do you have on proposed criteria or process?
- What feedback do you have on approaching use of limited funds for adult vaccine?
