

Outstanding Surface Water Treatment Plants

10/2/2024

We evaluated the 2023 performance of 55 rapid rate surface water treatment plants in Washington. Thirty-two plants met optimization goals for particle removal and had no regulatory violations. By optimizing water quality produced by their existing facilities, these utilities perform above national regulatory standards—and provide better public health protection to their customers.

System Name	County	ID	Continuously Optimized Since
Anacortes, City Of	Skagit	02200	2016
